SECTION III – RISK FACTORS

An investment in equity shares involves a high degree of risk. You should carefully consider all the information disclosed in this Letter of Offer, including the risks and uncertainties described below and the “Financial Information” on page 76, before making an investment in the Equity Shares. The risks described below are not the only risks relevant to us or the Equity Shares or the industries in which we currently operate. Additional risks and uncertainties, not presently known to us or that we currently deem immaterial may also impair our business, cash flows, prospects, results of operations and financial condition. In order to obtain a complete understanding about us, investors should read this section in conjunction with “Our Business”, “Industry Overview” and “Management’s Discussion and Analysis of Financial Position and Results of Operations” on pages 52, 48 and 81, respectively, as well as the other financial information included in this Letter of Offer. If any of the risks described below, or other risks that are not currently known or are currently deemed immaterial actually occur, our business, cash flows, prospects, results of operations and financial condition could be adversely affected, the trading price of the Equity Shares could decline, and investors may lose all or part of the value of their investment. The financial and other related implications of the risk factors, wherever quantifiable, have been disclosed in the risk factors mentioned below.

However, there are certain risk factors where the financial impact is not quantifiable and, therefore, cannot be disclosed in such risk factors. You should consult your tax, financial and legal advisors about the particular consequences to you of an investment in this Issue. The following factors have been considered for determining the materiality: (1) some events may not be material individually but may be found material collectively; (2) some events may have material impact qualitatively instead of quantitatively; and (3) some events may not be material at present but may have material impact in future.

This Letter of Offer also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Letter of Offer. Any potential investor in, and purchaser of, the Equity Shares should pay particular attention to the fact that our Company is an Indian company and is subject to a legal and regulatory environment which, in some respects, may be different from that which prevails in other countries. For further information, see “Forward Looking Statements” on page 15.

Unless otherwise indicated or the context requires otherwise, the financial information included herein is based on our Audited Standalone Financial Statements included in this Letter of Offer. For further information, see “Financial Information” on page 76. In this section, unless the context otherwise requires, a reference to “our Company”, “we”, “us” or “our” is a reference to HCP Plastene Bulkpack Limited on a standalone basis.

Internal Risk Factors

- 1. Our lenders have imposed certain restrictive conditions on us under our financing arrangements. Further as on the date of the Letter of Offer our Company has not received “No objection” certificate from our lenders to undertake this issue. Non-receipt of such “No- Objection” certificate could lead to non-compliance of the terms of loan agreements entered into by our Company with said lenders.**

We have entered into agreements for availing debt facilities from lenders. Certain covenants in these agreements require us to obtain approval/permission from our lenders in certain conditions. In the event of default or the breach of certain covenants, our lender has the option to make the entire outstanding amount payable immediately. There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain consents necessary to take the actions that we believe are required to operate and grow our business.

Further, as on the date of the Letter of Offer, we have not received No Objection certificate from the lenders (Bank of Baroda). Our company has not taken permission for increase in share capital issued by way of right issue, bonus shares etc. as per the terms of sanction letter. We cannot assure you that such lenders will grant us consent and No-Objection certificate for this right Issue. Non-receipt of such consent and No-Objection certificate could lead to non-compliance of the terms of loan agreements entered into by our Company with the lenders.

- 2. Failure of the issuer to meet the listing requirements of any stock exchange in India or abroad and the details of penalty, if any, including suspension of trading, imposed by such stock exchanges.**

Our Company took approval of Members via Special Resolution passed in the Annual General Meeting held in the year 2004 to delist the equity shares of the Company from The Calcutta Stock Exchange Association Limited (CSE), Jaipur Stock Exchange Limited and The Stock Exchange, Ahmedabad pursuant to the Securities and Exchange Board of India (Delisting of Securities) Guidelines, 2003, the Securities Contracts (Regulation) Act, 1956 and all other applicable laws, rules, regulations and guidelines (including any statutory modification(s) or reenactment(s) thereof for

the time being in force). Subsequently, the Company made Delisting Application to all the Exchanges. Further, the reply from Calcutta Stock Exchange is still awaited and Company's Trading is suspended at CSE. Any Penalty if imposed by CSE for Non-Compliances for prior or during CIRP Period could affect our Financial Position.

SOP Fine of 56.91 Lacs is levied by BSE Limited on Company for non-filing/delay in filing in Compliances related to SEBI LODR Regulations 2015 for prior or during CIRP Period. Pursuant to section 32 A of IBC, the liability of a corporate debtor for an offence committed prior to the commencement of the corporate insolvency resolution process shall cease, and the corporate debtor shall not be prosecuted for such an offence from the date the resolution plan has been approved by the Adjudicating Authority under section 31, if the resolution plan results in the change in the management or control of the corporate debtor to a person. Further if BSE Limited does not waive above penalties then such Penalties could adversely affect our operations and Financial Position.

3. The novel coronavirus (Covid-19) pandemic outbreak and steps taken control the same have significantly impacted our business, results of operations, financial condition and cash flows and further impact will depend on future developments, which are highly uncertain.

The outbreak of COVID-19 was recognized as a public health emergency of international concern on January 30, 2020 and as a pandemic by the WHO on March 11, 2020. In response to the COVID-19 outbreak, the governments of many countries, had/have taken preventive or protective actions, such as imposing country-wide lockdowns, as well as restrictions on travel and business operations. The Government of India had announced a nation-wide lockdown on March 24, 2020 and imposed several restrictions. While progressive relaxations have since been granted for movement of goods and people and cautious re-opening of businesses and offices, lockdowns may be reintroduced in the future. Certain countries have reinstated lockdown conditions due to a "second wave" of the COVID-19 outbreak and the discovery of a new strain of the coronavirus in the United Kingdom. Further the State Governments reinstated complete lockdown conditions and/or imposed additional restrictions owing to the "second wave" of the pandemic during the first quarter of the current financial year.

The rapid spread of COVID-19 and global health concerns relating to this outbreak have had a severe negative impact on all businesses including retail sector. The COVID-19 pandemic could continue to have an impact that may worsen for an unknown period of time. While the Government of India and other governments in the world have initiated its COVID-19 vaccination drive, there is still some uncertainty relating to the impact of the COVID-19 pandemic on the global and the Indian economy, and we are unable to accurately predict the near-term or long-term impact of the COVID-19 pandemic on our business. Accordingly, if the uncertainty relating to the impact of the COVID-19 pandemic continues, our business operations may be impacted adversely. Furthermore, even though all members of our team are duly vaccinated against Covid still in the event any member or members of our management or operations team being severely impacted by COVID-19, it may potentially affect our operations. The impact of COVID-19 pandemic on the overall economic environment still being uncertain. Any risks arising on account of a fresh round of COVID-19 such as in relation to lockdown, slowdown of economic activities, loss of life and debilitation of key personnel can have an adverse effect on our business, results of operations, cash flows and financial condition. We are not able to predict the duration and severity of the economic conditions arising out of a fresh outbreak of COVID-19 pandemic and as a consequence, our financial results for a particular period are difficult to predict.

4. Our Company has incurred losses during the last financial years. Such financial losses sustained by us in the most recent financial year, may not be perceived positively by external parties such as investors, clients, customers, bankers etc., which may affect our credibility and business operations.

Our Company was taken over by a new management during the financial year 2020-21, pursuant to resolution plan submitted by Plastene India Limited and duly approved by Hon'ble NCLT, Ahmedabad Bench vide its order no. IA 178 of 2020 in C.P. (I.B.) 08/NCLT/AHM/ 2019 dated August 07, 2020. Presently the Company is a part of Plastene Group (PIL), a reputed FIBC manufacturer and exporter from India with a diverse portfolio comprising of FIBCs and small bags. Although, the Company has made an application to Hon'ble National Company Law Tribunal at Ahmedabad Bench, for relaxing the said obligation of issue of Zero coupon Non-convertible Debenture and allow the Company to prepay amount of Rs. 1.60 Cr. in place of issuance of Zero coupon Non-convertible Debenture looking at the very small size of Zero coupon Non-convertible Debenture. 17. Being a manufacturing company, we have low net profit margins as compared to industry standards.

As company being a Manufacturing Company has lower Profit Margins. Due to lower margins, we have lower EPS for our shareholders and may continue to do so. If the margins do not increase over time, we may continue to earn lower profits on higher revenues resulting in slower growth and affect overall financial condition. The management believes that lower margins are mainly due to non-compromise on quality and compliance which is beneficial in the long run. If we are unable to increase our margins, it may affect our growth prospects, profitability, operations and overall financial condition along with ability to absorb the fixed costs, if any, for the manufacture of new and innovative products.

18. Our business depends on our manufacturing facility and the loss of or shutdown of operations of the manufacturing facility on any grounds could adversely affect our business or results of operations.

Our manufacturing facilities are subject to operating risks such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output, raw material shortage or unsuitability, obsolescence, labour disputes, strikes, lock-outs, non-availability of services of our external contractors, earthquakes and other natural disasters, social unrests, industrial accidents, our ability to respond to technological advances and emerging industry and safety standards and practices in the industries in which we operate and propose to operate on a cost-effective and timely basis and any other factors which may or may not be within our control and also we need to comply with the directives of relevant government authorities. The occurrence of any of these risks could significantly affect our operating results.

Although we take precautions to minimize the risk of any significant operational problems at our facilities, our business, financial condition, results of operations and the trading price of our Equity Shares may be adversely affected by any disruption of operations at our facilities, including due to any of the factors mentioned above.

19. Failure to effectively manage labour or failure to ensure availability of sufficient labour could affect the business operations of the Company.

Our business activities are dependent on availability of skilled and unskilled labour. Non-availability of labour at any time or any disputes with them may affect our production schedule and timely delivery of our products to customers which may adversely affect our business and result of operations. Although, we have entered into contract for supply of contractual labour but there is no certainty that we will be able to get the requisite amount of manpower whenever required. Though we have not faced any labour problem in the past, we cannot assure that we will not experience disruptions to our operations due to disputes or other problems with our work force, which may lead to strikes, lock-outs or increased wage demands. Such issues could have adverse effect on our business, and results of operations.

20. Any inability on our part to maintain quality standards could adversely impact our business, results of operations and financial condition.

Quality control is vital element for our sector. Any rapid change in our customers' expectation on account of changes in technology or introduction of new product or any other reason and failure on our part to meet their expectation could adversely affect our business, results of operations and financial condition. If the transactions are executed not on Arms' Length Price and in Ordinary Course of Business, our financial position may get affected to that extent.

22. Our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.

We maintain insurance that we consider to be sufficient typical in our industry in India and in amounts which are commercially appropriate for a variety of risks, including fire and burglary. However, such insurance may not be adequate to cover all losses or liabilities that may arise from our business operations, particularly if the loss suffered is not easily quantifiable. Our insurance policies contain exclusions and limitations on coverage, as a result of which, we may not be able to successfully assert our claims for any liability or loss under such insurance policies. Additionally, there may be various other risks and losses for which we are not insured because such risks are either uninsurable or not insurable on commercially acceptable terms. Furthermore, there can be no assurance that in the future we will be able to maintain insurance of the types or at levels which we deem necessary or adequate or at premiums which we deem to be commercially acceptable.

The occurrence of an event for which we are not insured, where the loss is in excess of insured limits occurs or where we are unable to successfully assert insurance claims from losses, could result in uninsured liabilities. However, in ordinary course of business, there have been no such instances of inadequacy of insurance cover of our assets which had adversely affected our operation and financials in preceding three financial year. Further, despite such uninsured

losses we may remain obligated for any financial indebtedness or other obligations related to our business. Any such uninsured losses or liabilities could result in an adverse effect on our business and financial results.

Various factors may lead to a slowdown in the Indian, which in turn may adversely impact our business, prospects, financial performance and operations. In the past, the Indian economy has been affected by global economic uncertainties, liquidity crisis, domestic policies, global political environment, volatility in interest rates, currency exchange rates, commodity and electricity prices, volatility in inflation rates and various other factors. Accordingly, high rates of inflation in India could increase our employee costs and decrease our operating margins, which could have an adverse effect on our results of operations. Any slowdown in the economy of the markets in which we operate may adversely affect our business and financial performance of our business and operation.

2. Terrorist attacks, civil disturbances, regional conflicts and other acts of violence in India and abroad may disrupt or otherwise adversely affect the Indian economy, the health of which our business depends on.

India has from time to time experienced social and civil unrest and terrorist attacks. These events could lead to political or economic instability in India. Events of this nature in the future could have a material adverse effect on our ability to develop our business. As a result, our business, results of operations and financial condition may be adversely affected. India has also experienced social unrest, Naxalite violence and communal disturbances in some parts of the country. If such tensions occur in places where we operate or in other parts of the country, leading to overall political and economic instability, it could adversely affect our business, results of operations, financial condition and trading price of our Equity Shares.

3. We foresees competition from existing and future indigenous manufacturers which may have adverse effect on our business, prospects, results of operations and financial condition.

We operate in a competitive business environment. Segment in which our company is currently operating and further expanding into is constantly evolving with capacity additions and addition of new suppliers. Growing competition may subject us to pricing pressures and require us to reduce the prices of our products and services in order to retain or attract customers, which may have a material adverse effect on our revenues and margins. Further, several of our competitors whether in India or overseas are larger international and national companies and have access to greater resources, wider geographical reach, broader product ranges or may be able to develop or acquire technology or partner with innovators or customers at terms which are not presently feasible for us, due to our current scale of operations. Further, they may succeed in developing products that are far more effective, more technologically advanced, more popular or cheaper than our products. Any of these factors may have a material adverse effect on our business, prospects, results of operations and financial condition.

4. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws and regulations, such as application of GST, may adversely affect our business results of operations, cash flows and financial performance.

Changes in the operating environment, including changes in tax law, could impact the determination of our tax liabilities for any given tax year. Taxes and other levies imposed by the Government of India that affect our industry include income tax, goods and services tax and other taxes, duties or surcharges introduced from time to time. The tax scheme in India is extensive and subject to change from time to time. For instance, as of July 1, 2017, GST in India replaced taxes levied by central and state governments with a unified tax regime in respect of the supply of goods and services in India. Any adverse changes in any of the taxes levied by the Government of India may adversely affect our competitive position and profitability. We cannot assure you that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the countries in which we operate may materially and adversely affect our business, results of operations and financial condition. In addition, we may have to incur expenditure to comply with the requirements of any new regulations, which may also materially harm our results of operations. We are also subject to these risks in all our overseas operations depending on each specific country. Any unfavorable changes to the laws

and regulations applicable to us could also subject us to additional liabilities. As a result, any such changes or interpretations may adversely affect our business, financial condition and financial performance. Further, changes in capital gains tax or tax on capital market transactions or sale of shares may affect investor returns.

RISKS RELATING TO THE EQUITY SHARES

1. Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.

The Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renouncee(s) may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renouncee(s) prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renouncee will not be able to apply in this Issue with respect to such Rights Entitlements.

2. The Rights Entitlement of Eligible Equity Shareholders holding Equity Shares in physical form (“Physical Shareholder”) may lapse in case they fail to furnish the details of their demat account to the Registrar.

In accordance with Regulation 77A of the SEBI ICDR Regulations read with SEBI – Rights Issue Circular, the credit of Rights Entitlement and Allotment of Rights Equity Shares shall be made in dematerialised form only. Accordingly, the Rights Entitlements of the Physical Shareholders shall be credited in a suspense escrow demat account opened by our Company during the Issue Period. The Physical Shareholders are requested to furnish the details of their demat account to the Registrar not later than two working days prior to the Issue Closing Date (i.e., on or before Friday, April 8, 2022,) to enable the credit of their Rights Entitlements in their demat accounts at least one day before the Issue Closing Date. The Rights Entitlements of the Physical Shareholders who do not furnish the details of their demat account to the Registrar not later than two working days prior to the Issue Closing Date, shall lapse. Further, pursuant to a press release dated December 3, 2018 issued by the SEBI, with effect from April 1, 2019, a transfer of listed Equity Shares cannot be processed unless the Equity Shares are held in dematerialized form (except in case of transmission or transposition of Equity Shares).

3. The B-WAP payment mechanism facility proposed to be used for this Issue may be exposed to risks, including risks associated with payment gateways.

In accordance with SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/78 dated May 6, 2020 read with SEBI circular SEBI/HO/CFD/DIL1/CIR/P/2020/136 dated July 24, 2020 and SEBI circular SEBI/HO/CFD/DIL1/CIR/P/2021/13 dated January 19, 2021, a separate web-based application platform, i.e., the B-WAP facility (accessible at www.bigshareonline.com), has been instituted for making an Application in this Issue by resident Investors. Further, B-WAP is only an additional option and not a replacement of the ASBA process. On B-WAP, the eligible resident Investors can access and fill the Application Form in electronic mode and make online payment using the internet banking or UPI facility from their own bank account thereat. For details, see “**Terms of the Issue – Making of an Application through the Registrar’s Web-based Application Platform (“B- WAP”) process**” on page 109. Such payment gateways and mechanisms are faced with risks such as:

- keeping information technology systems aligned and up to date with the rapidly evolving technology in the payment services industries;
- scaling up technology infrastructure to meet requirements of growing volumes;
- applying risk management policy effectively to such payment mechanisms;
- keeping users’ data safe and free from security breaches; and
- effectively managing payment solutions logistics and technology infrastructure.

Further, B-WAP is a new facility which has been instituted due to challenges arising out of COVID-19 pandemic. We cannot assure you that B-WAP facility will not suffer from any unanticipated system failure or breakdown or delay, including failure on part of the payment gateway, and therefore, your Application may not be completed or rejected. These risks are indicative and any failure to manage them effectively can impair the efficacy and functioning of the

payment mechanism for this Issue. Since Application process through B-WAP is different from the ASBA process, there can be no assurance that investors will not find difficulties in accessing and using the B-WAP facility.

4. Any future issuance of the Equity Shares, or convertible securities by our Company may dilute your future shareholding and sales of the Equity Shares by our Promoters or other major shareholders of our Company may adversely affect the trading price of the Equity Shares.

Any future issuance of the Equity Shares, or convertible securities by our Company, including through exercise of employee stock options or restricted stock units may lead to dilution of your shareholding in our Company, adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. Further, any future sales of the Equity Shares by the Promoters and members of our Promoter Group, or other major shareholders of our Company may adversely affect the trading price of the Equity Shares.

5. There is no guarantee that our Equity Shares will be listed in a timely manner or at all, and any trading closures at the Stock Exchanges may adversely affect the trading price of our Equity Shares.

In accordance with Indian law and practice, final approval for listing and trading of the Equity Shares will not be granted by the Stock Exchanges until after those Equity Shares have been issued and allotted. Approval will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares. Further, historical trading prices, therefore, may not be indicative of the prices at which the Equity Shares will trade in the future.

Secondary market trading in our Equity Shares may be halted by a stock exchange because of market conditions or other reasons. Additionally, an exchange or market may also close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at a particular point in time.

6. Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.

Under the Companies Act, any company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution, unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

7. There may not be an active or liquid market for our Equity Shares, which may cause the price of the Equity Shares to fall and may limit your ability to sell the Equity Shares.

The price at which the Equity Shares will trade after this Issue will be determined by the marketplace and may be influenced by many factors, including:

- our financial results and the financial results of the companies in the businesses we operate in;
- the history of, and the prospects for, our business and the sectors in which we compete;
- the valuation of publicly traded companies that are engaged in business activities similar to us; and
- significant developments in India's economic liberalization and deregulation policies.

In addition, the Indian equity share markets have from time to time experienced significant price and volume fluctuations that have affected the market prices for the securities of Indian companies. As a result, investors in the Equity Shares may experience a decrease in the value of the Equity Shares regardless of our operating performance or prospects.

Neither we nor any other person connected with this Issue have verified this information. The data may have been re-classified by us for the purposes of presentation. Industry sources and publications generally state that the information contained therein has been obtained from sources generally believed to be reliable, but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured and, accordingly investment decisions should not be based on such information.

OVERVIEW OF THE ECONOMY

The Indian economy was negatively impacted by an unprecedented health crisis in 2020-21 with the highly contagious corona virus (Covid-19) spreading across the country. In response to the pandemic, Government has taken several proactive preventive and mitigating measures starting with progressive tightening of international travel, issue of advisories for the members of the public, setting up quarantine facilities, contact tracing of persons infected by the virus and various social distancing measures. Government imposed a strict 21 days nationwide lockdown from 25th March, 2020, under the Disaster Management Act, 2005, with subsequent extensions and relaxations, to contain the spread of Covid-19 while ramping up the health infrastructure in the country. The lockdown measures, imposed to contain the spread of Covid-19 pandemic in India, ubiquitously affected employment, business, trade, manufacturing, and services activities. The real Gross Domestic Product (GDP) growth is projected to contract by 7.7 percent in 2020-21 as compared to a growth of 4.2 percent in 2019-20.

GDP growth, however, is expected to rebound strongly in 2021-22 owing to the reform measures undertaken by the Government. The Government announced a special economic and comprehensive package under Atmanirbhar Bharat of ` 20 lakh crore - equivalent to 10 percent of India's GDP – to fight the Covid-19 pandemic in India. Several structural reforms announced as part of the package, *inter alia*, include deregulation of the agricultural sector, change in definition of MSMEs, new PSU policy, commercialization of coal mining, higher FDI limits in defence and space sector, development of Industrial Land/ Land Bank and Industrial Information System, Production Linked Incentive Schemes, revamp of Viability Gap Funding scheme for social infrastructure, new power tariff policy and incentivizing States to undertake sector reforms. Apart from this, various steps were taken to boost consumption which, *inter alia*, includes cash payment in lieu of the Leave Travel Concessions (LTC) scheme, One-time special Festival advance of ` 10,000 (interest-free) for central Government employees. Other steps such as Interest-free 50- year loan to states, additional capital expenditure budget for the central Government, launch of Emergency Credit Line Guarantee Scheme (ECLGS) 2.0, ` 1.46 lakh crore boost for manufacturing through Production-linked incentives for ten Champion Sectors, ` 18,000 crores additional outlay for PM Awaas Yojana (PMAY) –Urban, Equity infusion in National Investment and Infrastructure Fund (NIIF) Debt Platform, Demand booster for Residential Real Estate Income Tax relief for Developers & Home Buyers, Boost for Project Exports, Capital and Industrial Stimulus has been initiated to support economic growth.

ECONOMIC GROWTH

As per the first Advance Estimates of annual national income released by the National Statistical Office (NSO), Real GDP is estimated to contract by 7.7 percent in 2020-21, as compared to a growth of 4.2 percent in 2019-20. This contraction in GDP growth is mainly attributed to the contraction in industry and services sector. The growth of Gross Value Added (GVA) at constant (2011-12) basic prices is estimated to contract by 7.2 percent in 2020-21, as compared to a growth of 3.9 percent achieved in 2019- 20. Positive growth in real GVA in agriculture & allied sectors at 3.4 percent in 2020- 21 against 4.0 percent in PE of 2019-20 indicates resilience of rural economic activity to the Covid-19 pandemic. From the demand side, private consumption expenditure is estimated to contract at 9.5 percent in 2020-21 as against a growth of 5.3 percent in 2019-20 and fixed investment is estimated to decline by 14.5 percent in 2020-21 as against 2.8 percent in 2019-20. Government consumption final expenditure is estimated to grow at 5.8 percent in 2020-21 as against 11.8 percent in 2019-20. Exports and imports of goods and services are estimated to contract at 8.3 percent and 20.5 percent (at constant prices) respectively in 2020-21.

GDP GROWTH

India's GDP will likely grow 9.2 percent in FY22, according to the Ministry of Statistics and Programme Implementation. The expansion of the Indian economy, as per the statistics ministry's first advance estimate of GDP for 2021-22 released on January 7, is lower than the forecast by the Reserve Bank of India (RBI). The central bank had last month reiterated its GDP growth forecast of 9.5 percent for FY22. While the estimated GDP growth rate of 9.2 percent for FY22 is the highest in at least 17 years, it has been aided by an extremely favourable base effect, with the GDP having contracted by a record 7.3 percent in FY21 on account of the COVID-19 pandemic.

As per the first advance estimate, which is based on available data for the first two to three quarters of the financial year, growth in gross value added for FY22 has been pegged at 8.6 percent.

CENTRAL GOVERNMENT FINANCES

The fiscal deficit and revenue deficit for 2020-21 were budgeted at 3.5 percent of GDP and 2.7 percent of GDP respectively. The BE 2020-21 envisaged a tax to GDP ratio of 10.8 percent and total expenditure to GDP ratio of 13.5 percent. The envisaged growth for Gross Tax Revenue was 12 percent over 2019-20 Revised Estimates (RE). The total expenditure in BE 2020-21 was estimated to increase by 12.7 percent over 2019-20 RE. However, the Covid-19 pandemic severely affected the Government revenues, while exerting pressure to increase Government Expenditure. As per the data on Union Government Finances released by Controller General of Accounts for April-November 2020, the Gross Tax Revenue decreased by 12.6 percent over the corresponding period of the previous year achieving 42.4 percent of the budget estimate. The non-tax revenue declined by 46.6 percent during April- November 2020, over the corresponding period of the previous year achieving 32.3 percent of the budget

estimate. At the end of November 2020, the non-debt capital receipts stood at 8.1 percent of the budget estimate. During April- November 2020, fiscal deficit reached 135.1 percent of the budgeted amount in 2020-21 higher relative to 114.8 percent of the budget estimate during the corresponding period of the previous year. The revenue deficit for April- November 2020 is 139.9 percent of the budget estimate and is higher than the corresponding figure of 128.4 percent in the previous year. The Revised Estimates place fiscal and revenue deficits at 9.5 percent of GDP and 7.5 percent of GDP respectively in 2020-21.

The launch of Covid-19 vaccination programme in the country will further add momentum to the economic recovery. In line with the projections for strengthening of India's growth by multi-lateral institutions, the nominal growth of the economy is expected to be 14.4 percent in the financial year 2021-22.

INDIAN TEXTILE INDUSTRY

INTRODUCTION

India's textiles sector is one of the oldest industries in the Indian economy, dating back to several centuries. The industry is extremely varied, with hand-spun and hand-woven textiles sectors at one end of the spectrum, while the capital-intensive sophisticated mills sector on the other end. The decentralised power looms/ hosiery and knitting sector forms the largest component in the textiles sector. The close linkage of textiles industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles makes it unique in comparison to other industries in the country. India's textiles industry has a capacity to produce wide variety of products suitable for different market segments, both within India and across the world.

MARKET SIZE

India is the world's second-largest producer of textiles and garments. It is also the fifth-largest exporter of textiles spanning apparel, home and technical products. The textiles and apparel industry contributes 2.3% to the country's GDP, 13% to industrial production and 12% to exports. India is working on major initiatives to boost its technical textile industry. Owing to the pandemic, the demand for technical textiles in the form of PPE suits and equipment is on the rise. The government is supporting the sector through funding and machinery sponsoring. Under Union Budget 2020 -21, a National Technical Textiles Mission is proposed for a period from 2020-21 to 2023-24 at an estimated outlay of Rs. 1,480 crore (US \$ 211 .76 million). Government is taking various steps to support textile industry which includes recent announcement of Production -linked Incentive (PLI) Scheme worth INR 10 ,683 crore (US\$ 1.44 billion) for manmade fibre and technical textiles over a five -year period. Increased awareness of goods, higher disposable incomes, changing customer patterns and some sector-specific growth drivers are estimated to bolster the Indian technical textiles market to US\$ 23.3 billion in 2027, up from US\$ 14 billion in 2020 in Asia-Pacific. The technical textiles market for automotive textiles is projected to increase to US\$ 3.7 billion by 2027, from US\$ 2.4 billion in 2020. Similarly, the industrial textiles market is likely to increase at an 8% CAGR from US\$ 2 billion in 2020 to US\$ 3.3 billion in 2027.

INVESTMENTS AND KEY DEVELOPMENTS

The textiles sector has witnessed a spurt in investment during the last five years. The industry (including dyed and printed) attracted Foreign Direct Investment (FDI) worth US\$ 3.75 billion from April 2000 to March 2021. In May 2021, Indo Count Industries Ltd. (ICIL), announced an investment of Rs. 200 crore (US\$ 26.9 million) to expand its production capacity. The production-linked incentive (PLI) scheme for man-made fibre and technical textiles will help boost manufacturing, increase exports and attract investments into the sector. Companies in home textile are using technology to optimise the value chain. For example, in October 2021, Welspun India introduced Wel-Trak 2.0—an

upgraded, patented end-to-end traceability technology—to track textile raw materials throughout the supply chain. Home textile companies in India are also leveraging strategic partnerships to strengthen their business operations and foothold in the country. In October 2021, Welspun India collaborated with DuPont Biomaterials to introduce a home textile range and strengthen the company's sustainable textiles business.

ROAD AHEAD

India is working on major initiatives, to boost its technical textile industry. Owing to the pandemic, the demand for technical textiles in the form of PPE suits and equipment is on rise. Government is supporting the sector through funding and machinery sponsoring. Top players in the sector are attaining sustainability in their products by manufacturing textiles that use natural recyclable materials. The future for the Indian textiles industry looks promising, buoyed by strong domestic consumption as well as export demand. With consumerism and disposable income on the rise, the retail sector has experienced a rapid growth in the past decade with the entry of several international players like Marks & Spencer, Guess and Next into the Indian market. High economic growth has resulted in higher disposable income. This has led to rise in demand for products creating a huge domestic market.

Our success lies in the strength of our relationship with our customers who have been associated with our company for continues period. We get the orders from our customers who are domestic based. Our Promoter Director through their experience and good relations with customers owing to timely and quality delivery of products plays an instrumental role in creating and expanding a work platform for our Company.

OUR OPPORTUNITIES

1. Growing industrialization in India, leading to more demand of sophisticated packaging by end customer. The Company is main supplier to cement industry and all major players in cement industries are doing their expansion on regular basis so demand of bags is increasing.
2. With the beginning of organised retailing of agro & food products, the packaging requirement with value added PP bags has emerged creating a new market for the company's product.
3. Poor showing of jute industry. Hence food grain sector shows ample scope in future.
4. Export, retail packing of sugar and food grain shifting to PP sacks segment.
5. Ready to wear garment in domestic market is increasing due to changing fashion trend which is creating a new demand for label product for the company.

OUR THREATS

1. The threats of competition out of new capacities.
2. The company is engaged in the manufacture of HDPE/ PP bags and price of its raw material i.e. plastic granules is affected by fluctuations in crude oil prices and dollar. Domestic market is more price sensitive than quality sensitive.

LONG TERM STRATEGY

5. For the purpose of our examination, we have relied on:
- a) Auditor's report issued by us dated June 11, 2021 on the Ind AS financial statements of the company as at and for the year ended March 31, 2021 as referred in Paragraph 4a above;
 - b) Auditor's Reports issued by us dated July 30, 2020 and October 21, 2019 on the Ind AS financial statements of the company as at and for the year ended March 31, 2020, and as at March 31, 2019 respectively, as referred in Paragraph 4b above; and
 - c) Limited Review report issued by us dated November 10, 2021 on the Ind AS financial statements of the company as at and for the Quarter ended September 30,2021 as referred in Paragraph 4c above.
6. The audit reports referred to in paragraph 5 above included the following matters:
- a) The audit report for the year ended March 31, 2021 included the below 'Emphasis of Matter':
 - i. Note no. 31(A) to the Financial Statements, in respect of reconstitution of the Board of Directors of the Company post the successful completion of Corporate Insolvency Resolution Process (CIRP).
 - ii. Note no. 30 to the Financial Statements, in respect of exceptional item which includes Rs. 6.37 lakhs recognized as Impairment against Intangible Assets & Property, Plant and Equipment, Rs. 2082.13 lakhs as Written off of Inventories, Trade Receivables & Current Assets and Rs. 7622.23 lakhs as written back of Trade Payables & Financial Liabilities and Rs. 61.91 lakhs recognised as CIRP Cost, Rs. 88.31 lakhs as one-time Plant start-up expenses and Rs. 41.48 Lakhs as Loss due to theft of Property, Plant and Equipment.
 - iii. Note no. 31(B)(1) to the Financial Statements, in respect of adjustment being carried out pursuant to the capital reduction of equity share capital thereof being recognised in Equity i.e. Capital Reserve as required in terms of Resolution Plan approved by NCLT.

Our opinion is not modified in respect of the above matters.

- b) The audit report for the year ended March 31, 2020 included the below 'Basis for Adverse Opinion' and 'Emphasis of Matter':

'Basis of Adverse Opinion'

- i. In respect of Inventories, during the reporting period, the management has not undertaken physical verification of Inventories at periodic intervals and has not obtained any technical /market/commercial evaluation for the inventories. Hence, we are unable to comment on the realizable value of the same, which may be lower than the amount at which it has been reflected in the balance sheet. Indirect taxes are also considered as part of Inventory cost. The Company has not maintained adequate inventory records at the factory. No provision has been made on diminution in the value of old and slow-moving inventory. The impact of the above remarks, presently not ascertainable and, therefore, cannot be commented upon.
- ii. In respect of Trade Receivables amounting to Rs. 1962.91 Lakhs., we have not received balance confirmations from the debtors. The realisability of these amounts is doubtful and company has not made any provision for Bad and Doubtful debts in respect of these receivables, other than specified in Note no. 36. In our opinion, the provision made is inadequate and the impact on loss and carrying value of trade receivables could not be ascertained.
- iii. Note 31 (XVIII) to the standalone financial statements, in respect of recognition of deferred tax assets on account of carried forward unused tax losses and other taxable temporary differences aggregating to Rs. 356.43 lakhs. The Management of the Company is confident that sufficient future taxable income will be available against which such deferred tax assets will be realized. However, in our opinion, in absence of convincing evidence that sufficient future taxable income will be available against which such deferred tax assets can be realized, such recognition is not in accordance with Indian Accounting Standard 12 "Income Taxes" (Ind AS 12). Had the aforesaid deferred tax assets not been recognized, loss after tax for the year ended on March 31, 2020 would have been higher by Rs. 33.16 Lakhs and other equity would have been lower by same amount.
- iv. The borrowings have not been shown on amortized cost method as required under Ind AS. Hence the same are not subsequently measured using the EIR method as per Ind AS 109.
- v. The present liability for future payment of gratuity as on March 31, 2020 is not actuarially determined and provided for as per Indian Accounting Standard – 19 (Ind AS 19), "Employee Benefits". However, the Company has provided for the amount of gratuity liability for the employees on the basis of the

management's estimate. In the absence of actuarial valuation report, the quantum of short provision of gratuity and its impact on the Statement of Profit and Loss for the period ended March 31, 2020 cannot be determined.

- vi. As reported in Note 32 to the standalone financial statements, No Impairment of Assets has been carried out as on year end, Also Value in use of fixed assets is not determined by the company. Hence fixed assets have not been subjected to impairment testing under IND AS 36, Impairment of Assets. In absence of any alternative corroborative evidence, we are unable to comment on the recoverability of the same.

'Emphasis of Matter'

- i. Note No. 14.1 to financial statement in respect of arrears of dividend on Cumulative Redeemable Preference Share.
- ii. Note no. 32, 33, 36 of the financial statements in respect of Physical Verification of Fixed Assets, pending statutory dues and various claims received from Operational, Financial Creditors and Employees and Other Creditors.
- iii. Note 34 to the standalone financial statements, in respect of various claims, submitted by the financial creditors, operational creditors, workmen or employee and authorized representative of workmen and employees of the Company to Resolution Professional pursuant to the Insolvency and Bankruptcy Board of India (Insolvency Resolution Process for Corporate Persons) Regulation 2016, that are currently under consideration/reconciliation. Pending reconciliation/admission of such claims by the RP, we are unable to comment on the consequential impact, if any, on the accompanying statement.
- iv. Note no 44 to Financial Statements in respect of Contingent Liabilities.
- v. Note no 47 to Event Occurred after Balance Sheet Date in respect of Resolution plan received from M/s. Plastene India Limited, based on highest quote or benefit to the stake holders has been approved by Committee of Creditors ("CoC") which is pending for approval by Hon'ble NCLT Court.

Our opinion is not modified in respect of these matters.

- c) The audit report for the year ended March 31, 2019 included the below 'Basis for Adverse Opinion' and 'Emphasis of Matter':

'Basis of Adverse Opinion'

- i. In respect of Inventories, during the reporting period, the management has not undertaken physical verification of Inventories at periodic intervals and has not obtained any technical /market/commercial evaluation for the inventories. Hence, we are unable to comment on the realizable value of the same, which may be lower than the amount at which it has been reflected in the balance sheet. Indirect taxes are also considered as part of Inventory cost. The Company has not maintained adequate inventory records at the factory. No provision has been made on diminution in the value of old and slow-moving inventory. The impact of the above remarks, presently not ascertainable and, therefore, cannot be commented upon
- ii. In respect of Trade Receivables amounting to Rs. 54.37 Cr., we have not received balance confirmations from the debtors. The realisability of these amounts is doubtful and company has not made any provision for Bad and Doubtful debts in respect of these receivables, other than specified in Note no. 36. In our opinion, the provision made is inadequate and the impact on loss and carrying value of trade receivables could not be ascertained. Further, there have been instances where the company had set off receivable / payable balances of one party against payable / receivable balances of multiple parties without routing the transactions through the company bank accounts.
- iii. Note 31 (XVIII) to the standalone financial statements, in respect of recognition of deferred tax assets on account of carried forward unused tax losses and other taxable temporary differences aggregating to Rs. 323.26 lakhs. The Management of the Company is confident that sufficient future taxable income will be available against which such deferred tax assets will be realized. However, in our opinion, in absence of convincing evidence that sufficient future taxable income will be available against which such deferred tax assets can be realized, such recognition is not in accordance with Indian Accounting Standard 12 "Income Taxes" (Ind AS 12). Had the aforesaid deferred tax assets not been recognized, loss after tax for the year ended on March 31, 2019 would have been higher by Rs. 26.69 Lakhs and other equity would have been lower by same amount.
- iv. The borrowings have not been shown on amortized cost method as required under Ind AS. Hence the same are not subsequently measured using the EIR method as per Ind AS 109.
- v. The present liability for future payment of gratuity as on March 31, 2019 is not actuarially determined and provided for as per Indian Accounting Standard – 19 (Ind AS 19), "Employee Benefits" and also as per the provisions of section 128 of the Companies Act, 2013 relating to preparation of books of account on accrual basis. The Company has provided for the amount of gratuity liability for the

employees on the basis of management's estimate. In the absence of actuarial valuation report, the quantum of short provision of gratuity and its impact on the Statement of Profit and Loss for the period ended March 31, 2019 cannot be determined.

- vi. As reported in Note 32 to the standalone financial statements, in respect of physical verification conducted by the employees and not by any technical personnel, fair value reports of fixed assets of Rs. 3858.96 Lakhs for Tangible Assets and 3.23 Lakhs for Intangible Assets as at March 31, 2019 are not available from any Technical Personnel. The said assets are not tested for impairment and hence no provision for impairment has been made. In absence of any alternative corroborative evidence, we are unable to comment on the recoverability of the same.

‘Emphasis of Matter’

- i. Note No. 14.1 to financial statement in respect of arrears of dividend on Cumulative Redeemable Preference Share.
- ii. Note no. 33 of the financial statements in respect of pending statutory dues.
- iii. Note 34 to the standalone financial statements, in respect of various claims, submitted by the financial creditors, operational creditors, workmen or employee and authorized representative of workmen and employees of the Company to Resolution Professional pursuant to the Insolvency and Bankruptcy Board of India (Insolvency Resolution Process for Corporate Persons) Regulation 2016, that are currently under consideration/reconciliation. Pending reconciliation/admission of such claims by the RP, we are unable to comment on the consequential impact, if any, on the accompanying statement.
- iv. Note no 44 to Financial Statements in respect of Contingent Liabilities.
- v. Note no 48 to Financial Statements giving details of Events Occurring after Balance Sheet Date.
- vi. Note no. 49 to Financial Statements in respect of certain transactions without NOC from the principal lender bank.

Our opinion is not modified in respect of these matters.

Difference between actual results and estimates are recognized in the period in which they are known/ materialized.

ii. Current verses non-current classification

The Company presents assets and liabilities in the Balance Sheet based on current/non-current classification.

An asset is current when it is:

- Expected to be realised or intends to be sold or consumed in the normal operating cycle;
- Help primarily for the purpose of trading;
- Expected to be realised within twelve months after the reporting period; or
- Cash and cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in the normal operating cycle;
- It is held primarily for the purpose of trading;
- It is due to be settled within twelve months after the reporting period; or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Company classifies all other liabilities as non-current.

However as CIRP process has been initiated all liabilities towards Banking Facilities have been converted in to Current Demands and hence shown under Current Liabilities.

Operating cycle

Operating cycle of the Company is the time between the acquisition of assets for processing and their realization in cash or cash equivalents. As the Company's normal operating cycle is not clearly identifiable, it is assumed to be twelve months.

iii. Use of estimates and judgements

The estimates and judgments used in the preparation of the financial statements are continuously evaluated by the Company and are based on historical experience and various other assumption and factors (including expectations of future events) that the Company believes to be reasonable under the existing circumstances. Difference between actual results estimates are recognized in the period in which the result is known/materialized.

The said estimates are based on the facts and events, that existed as at reporting date, or that occurred after that date but provide additional evidence about conditions existing as at the reporting date.

Estimation of uncertainties relating to COVID-19 Pandemic (COVID-19):

The Company has considered the possible effects that resulted from COVID-19 on the carrying amounts of financial assets, inventory, receivables, advances, property plant and equipment, Intangibles etc. Having reviewed the underlying data and based on current estimates, the company expects the carrying amount of these assets will be recovered and there is no significant impact on liabilities accrued. The impact of COVID-19 on the Company's financial statements may differ from that estimated as at the date of approval of these financial statements and the Company will continue to closely monitor any material changes to future economic conditions

iv. Financial Instruments

A financial instrument is a contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

A. Financial asset**i. Classification and measurement****Classification**

The Company classifies its financial assets, other than investments in subsidiaries and joint venture in the following measurement categories:

- a. those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- b. those measured at amortised cost.

The classification depends on the Company's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or other comprehensive income. For investments in debt instruments, this will depend on the business model in which the investment is held. For investments in equity instruments, this will depend on whether the Company has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income.

The Company reclassifies debt investments when and only when its business model for managing those assets changes.

Measurement

At initial recognition, all financial assets are measured initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss. Purchase or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trade) are recognised on trade date.

Debt instruments

Subsequent measurement of debt instruments depends on the Company's business model for managing the asset and the cash flow characteristics of the asset. There is only one measurement category into which the Company classifies its debt instruments as follows:

Amortised cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. A gain or loss on a debt investment that is subsequently measured at amortised cost and is not part of a hedging relationship is recognised in profit or loss when the asset is derecognised or impaired. Interest income from these financial assets is included in finance income using the effective interest rate method.

Trade receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment.

Cash and cash equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts which are repayable on demand and form an integral part of an entity's cash management system.

Other bank overdrafts are shown within borrowings in current liabilities in the balance sheet.

ii. Impairment of financial assets

The Company assesses on a forward looking basis the expected credit losses associated with its assets carried at amortised cost. The impairment methodology applied depends on whether there has been a significant increase in credit risk. Note 33.2 details how the Company determines whether there has been a significant increase in credit risk. For trade receivables only, the Company applies the simplified approach permitted by Ind AS 109 Financial Instruments, which requires expected lifetime losses to be recognised from initial recognition of the receivables.

iii. Derecognition of financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised when:

- The rights to receive cash flows from the financial asset have been transferred, or
- The Company retains the contractual rights to receive the cash flows of the financial asset but assumes a contractual obligation to pay the cashflows to one or more recipients.

When the Company has transferred an asset, it evaluates whether it has transferred substantially all risks and rewards of ownership of the financial asset. In such cases, the financial asset is derecognised. When the Company has not transferred substantially all the risks and rewards of ownership of a financial asset, the financial asset is not derecognised.

When the Company has neither transferred a financial asset nor retains substantially all risks and rewards of ownership of the financial asset, the financial asset is derecognised if the Company has not retained control of the financial asset. When the Company retains control of the financial asset, the asset is continued to be recognised to the extent of continuing involvement of the asset.

iv. Income recognition

Interest income from debt instruments is recognised using the effective interest rate method. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the gross carrying amount of a financial asset. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses. Dividends are recognised in profit or loss only when the right to receive payment is established, it is probable that the economic benefits associated with the dividend will flow to the Company, and the amount of the dividend can be measured reliably.

B. Financial liabilities

i. Initial recognition and measurement:

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through statement of Profit and Loss, loans and borrowing, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The company's financial liabilities include trade and other payables, loans and borrowings including cash credit facilities from banks and derivative financial instruments.

ii. Subsequent measurement:

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at fair value through Statement of Profit and Loss. Financial liabilities at fair value through profit and loss include financial liabilities held for trading and financial liabilities designated upon initial recognition at fair value through Profit and loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivatives financial instruments entered into by the company that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109.

Gains or losses on liabilities held for trading are recognized in the Statement of Profit and loss.

Financial liabilities designated upon initial recognition at fair value through statement of profit and loss are designated as such at the initial date of recognition and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/losses attributable to changes in own credit risks are recognized in OCI. These gains/losses are not subsequently transferred to P&L. However, the company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognized in the statement of profit and loss.

Loans and borrowings:

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognized in the statement of profit and loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

This category generally applies to borrowings.

Financial guarantee contracts:

Financial guarantee contracts issued by the company are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument.

Financial guarantee contracts are recognized initially as a liability at fair value through statement of profit and loss (FVTPL), adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount recognized less cumulative amortisation.

iii. Derecognition:

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of Profit and loss.

C. Derivative financial instrument:

The Company uses derivative financial instruments, such as forward currency contracts, to hedge its foreign currency risks. Such derivative financial instrument is initially recognized at fair value through consolidated statement of Profit and loss (FVTPL) on the date on which a derivative contract is entered into and is subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivative financial instrument are classified in the consolidated statement of Profit and loss and reported with foreign exchange gains/(loss) not within results from operating activities. Changes in fair value and gains/(losses) on settlement of foreign currency derivative financial instruments relating to borrowings, which have not been designed as hedge are recorded as finance cost.

D. Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to relate the assets and settle the liabilities simultaneously.

v. Foreign Currency Transactions:

The Company's financial statements are presented in INR, which is also the Company's functional and presentation currency.

Transactions in Foreign currency are recorded at the rate of exchange in force at the time transactions are effected and exchange difference, if any, on settlement of transaction is recognized in Profit & Loss Account. Monetary transaction balance other than FCDL as on date of Balance Sheet have been reported at exchange rate on Balance Sheet date and difference charged to profit & loss account. Forward contract premium paid on forward contracts are amortized to Profit & loss account over life of such contract.

vi. Fair value measurement

The Company measures financial instruments such as Investments at fair value at the end of each reporting period.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability

Or

- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by reassessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The Company's Management determines the policies and procedures for both recurring fair value measurement, such as derivative instruments and for non-recurring measurement, such as asset held for sale.

External valuers are involved for valuation of significant assets, such as properties. Involvement of external valuers is decided upon annually by the management after discussion with and approval by the Company's Audit Committee. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained. Management decides, after discussions with the Company's external valuers, which valuation techniques and inputs to use for each case.

However, such fair value report is not available for all assets except equity investment as on 31st March, 2021, Hence impairment Loss not booked for immovable properties.

At each reporting date, management analyses the movements in the values of assets and liabilities which are required to be re-measured or re-assessed as per the Company's accounting policies. For this analysis, The Management verifies the major inputs applied in the latest valuation by agreeing the information in the valuation computation to contracts and other relevant documents.

The Management, in conjunction with the Company's external valuers, also compares the change in the fair value of each asset and liability with relevant external sources to determine whether the change is reasonable on yearly basis.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy, as explained above. This note summarises accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

- Significant accounting judgements, estimates and assumptions
- Quantitative disclosures of fair value measurement hierarchy
- Property, plant and equipment & Intangible assets measured at fair value on the date of transition
- Investment properties
- Financial instruments (including those carried at amortised cost)

vii. Property, plant and equipment

Property, plant and equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of Property, plant and equipment are required to be replaced at intervals, the Company recognises such parts as individual assets with specific useful lives and depreciates them accordingly. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in profit or loss as incurred. The present value of the expected cost for the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for a provision are met.

All Property, plant & equipment have been physically verified by the management and also carry out impairment assessment for the same. As per management view, no material discrepancies are found / impairment is required, except specifically shown under exceptional item.

Derecognition

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the Statement of Profit and Loss when the asset is derecognised. However as stated above No Impairment loss is booked on 31st March 2019, 31st March, 2020 and 31st March, 2021 and 30th September 2021

Depreciation

Depreciation on property, plant and equipment is provided so as to write off the cost of assets less residual values over their useful lives of the assets, using the straight line method as prescribed under Part C of Schedule II to the Companies Act 2013.

When parts of an item of property, plant and equipment have different useful life, they are accounted for as separate items (Major Components) and are depreciated over their useful life or over the remaining useful life of the principal assets whichever is less.

Depreciation for assets purchased/sold during a period is proportionately charged for the period of use, irrespective of actual operation and uses of the assets in question.

viii. Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, Intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any.

The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over their useful economic lives and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the assets are considered to modify the amortization period or method, as appropriate, and are treated as changes in accounting estimates. The amortization expense on intangible assets with finite lives is recognised in the Statement of Profit and Loss. Intangible assets with indefinite useful lives are not amortized, but are tested for impairment annually, either individually or at the cash generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Statement of Profit and Loss when the asset is derecognised.

Amortisation

Software is amortized over management estimate of its useful life of 3 years.

Impairment of non-financial assets

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash generating unit's (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

ix. Inventories

Inventories of Raw material, Work-in-progress, finished goods and Stock-in-trade are valued at the lower of cost and net realizable value. However, Raw material and other items held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost.

Costs incurred in bringing each product to its present location and conditions are accounted for as follows:

- Raw materials: cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on first in, first out basis.
- Finished goods and work in progress: cost includes cost of direct materials and Labours and a proportion of manufacturing overheads based on the normal operating capacity, but excluding borrowing costs. Cost is determined on first in, first out basis.
- Traded goods: cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on weighted average basis.

All other inventories of stores, consumables, project material at site are valued at cost or NRV whichever is low. The stock of waste is valued at net realisable value.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

x. Revenue Recognition :

Sale of Goods

Effective 01 April 2018, the Company has adopted Indian Accounting Standard 115 (Ind AS 115) -'Revenue from contracts with customers' using the cumulative catch-up transition method, applied to contracts that were not completed as on the transition. Revenue is recognized on satisfaction of performance obligation upon transfer of control of promised products or services to customers in an amount that reflects the consideration the Company expects to receive in exchange for those products or services.

The Company does not expect to have any contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year. As a consequence, it does not adjust any of the transaction prices for the time value of money.

Revenue from the sale of goods is measured at the fair value of the consideration received or receivable including excise duty, net of returns and allowances, trade discounts, volume rebates and GST.

Interest Income

Interest is recognized on a time proportion basis taking into account the amount outstanding and the applicable interest rate.

Dividend

Dividend income is recognised when the Company's right to receive is established which is generally occur when the shareholders approve the dividend.

xi. Taxes on Income

Tax expense comprises of current income tax and deferred tax.

Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Current income tax relating to items recognised outside the statement of Profit and Loss is recognised outside the statement of Profit and Loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provision where appropriate.

Deferred income tax

Deferred income tax is provided using the liability method on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts for financial reporting purpose at the reporting date.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- When the Deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting profit nor taxable profit or loss;
- In respect of taxable temporary differences associated with investments in subsidiaries, when the timing of the reversal of the temporary differences can be controlled and it is probable that the differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognized to the extent it is probable that future taxable amounts will be available against the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilised except:

- When the deferred tax asset arises relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting profit nor taxable profit or loss.
- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint arrangements, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax assets to be utilised. Unrecognized deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside the statement of Profit and Loss is recognised outside the statement of Profit and Loss. Deferred tax items are recognised in correlation to the underlying transaction either in other comprehensive income or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

xii. Employee benefits

Short-term obligations

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognized in respect of employees services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet

Other long-term employee benefit obligations

The liabilities for earned leave and sick leave are not expected to be settled wholly within 12 months after the end of the period in which the employees render the related service. They are therefore measured as the present value of expected future payments to be made in respect of services provided by employees up to the end of the reporting period on government bonds using the projected unit credit method. The benefits are discounted using the market yields at the end of the reporting period that have terms approximating to the terms of the related obligation. Remeasurements as a result of experience adjustments and changes in actuarial assumptions are recognised in profit or loss.

The obligations are presented as current liabilities in the balance sheet if the Company does not have an unconditional right to defer settlement for at least twelve months after the reporting period, regardless of when the actual settlement is expected to occur.

Post-employment obligations

The Company operates the following post-employment schemes:

- a) defined benefit plans such as gratuity and
- b) defined contribution plans such as provident fund.

Defined benefit plan

The liability or asset recognised in the balance sheet in respect of defined benefit gratuity plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by actuaries using the projected unit credit method.

The present value of the defined benefit obligation is determined by discounting the estimated future cashout flows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation. The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in the statement of profit and loss.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the statement of changes in equity and in the balance sheet.

The main purpose of these financial liabilities is to finance the Company's operations. The Company's principal financial assets include loans, trade and other receivables, and cash and short-term deposits that derive directly from its operations.

The Company has exposure to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk
- Market risk

This note presents information about the Company's exposure to each of the above risks and how the Company is managing such risk.

The company's Board of Directors has overall responsibility for the establishment and oversight of the company's risk management framework. Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers and others. In addition, credit risk arises from financial guarantees.

The Company implements a credit risk management policy under which the Company only transacts business with counterparties that have a certain level of credit worthiness based on internal assessment of the parties, financial condition, historical experience, and other factors. The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The Company has established a credit policy under which each new customer is analyzed individually for creditworthiness.

The main components of this allowance are a specific loss component that relates to individually significant exposures, and a collective loss component that are expected to occur. The collective loss allowance is determined based on historical data of payment statistics for similar financial assets. Debt securities are analyzed individually, and an expected loss shall be directly deducted from debt securities.

Credit risk also arises from transactions with financial institutions, and such transactions include transactions of cash and cash equivalents and various deposits. The Company manages its exposure to this credit risk by only entering into transactions with banks that have high ratings. The Company's treasury department authorizes, manages, and oversees new transactions with parties with whom the Company has no previous relationship.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“FDI”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) (“DPIIT”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2020 (“FDI Circular 2020”), which, with effect from October 15, 2020, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2020 will be valid until the DPIIT issues an updated circular.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict, the relevant notification under Foreign Exchange Management (Non-Debt Instruments) Rules, 2019 will prevail. The payment of inward remittance and reporting requirements are stipulated under the Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 issued by RBI. The FDI Circular 2020, issued by the DPIIT, consolidates the policy framework in place as on October 15, 2020, and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

No investment under the FDI route (i.e any investment which would result in the investor holding 10% or more of the fully diluted paid-up equity share capital of the Company or any FDI investment for which an approval from the government was taken in the past) will be allowed in the Issue unless such application is accompanied with necessary approval or covered under a pre-existing approval from the government. It will be the sole responsibility of the investors to ensure that the necessary approval or the pre-existing approval from the government is valid in order to make any investment in the Issue.
